EDUCATION

GLOBAL ACADEMY OF TECHNOLOGY — Nov 2022 - June 2026
B.E | ARTIFICIAL INTELLIGENCE & MACHINE LEARNING | CGPA: 7.6 — Bengaluru

SKILLS: Python, C, React.js, HTML, CSS, MySQL, MongoDB, Data Science, Machine Learning, LLM, NLP, Generative AI, n8n, Tableau, Power BI, Blockchain, MS Word, MS Excel, Google Sheets, make.com

EXPERIENCE

LEARNER'S BYTE - AI Intern *(Jan 2026 – May 2026)*: Worked on Generative AI and Agentic AI-based solutions, developing AI-powered automation workflows using the n8n platform to streamline repetitive tasks. Contributed to intelligent workflow automation and AI-driven process optimization projects while integrating LLM-based capabilities into real-world development and automation applications.

PROJECTS

SKIN DISEASE DETECTION - [AI, ML, CNN, TF-IDF vectorization]: Developed a web application to detect and classify skin diseases using deep learning and text-based feature extraction techniques.

LLM GUARDRAILS - [Python, Hugging Face Transformers, BART MNLI, FastAPI, Streamlit, Groq API]: Developed a real-time AI safety layer for LLM applications to detect and block harmful instructions, self-harm content, & prompt injection attacks. Implemented zero-shot classification with BART MNLI and a confidence-based decision layer to balance safety and false positives, achieving approximately 300–500 ms P95 latency for CPU-based inference.

VISTA - Visually Impaired Smart Tracking Assistant - [IoT, CNN, Yolov8, OCR, ML, AI features]: Built a system that prioritizes safety by providing voice-controlled scene description, automatic fall detection, and GPS-enabled emergency location alerts for immediate assistance.

NLP CUSTOMER REVIEW ANALYTICS DASHBOARD - [NLTK, Scikit-Learn, spaCy, VADER, Plotly, WordCloud, Seaborn, Matplotlib, Altair, Streamlit, Custom CSS]: Developed an NLP-based dashboard to analyze e-commerce reviews using sentiment analysis & topic modelling. Built an interactive Streamlit dashboard with visualizations for sentiment trends, customer complaints, & keyword insights.

TITANIC SURVIVAL PREDICTION – [Pandas, NumPy, Scikit-Learn, Random Forest, Preprocessing, Streamlit, Kafka, Docker]: Built an end-to end machine learning system that predicts whether a passenger survived the disaster by using historical data, ML models, interactive dashboards, and real-time streaming using Kafka.

AI RECRUITMENT SYSTEM - [n8n, Grok API, Gmail API, Google Sheets, JavaScript]: Built an AI-driven recruitment platform that automates resume screening, candidate evaluation, & communication workflows. Integrated AI powered resume parsing, job-fit scoring, automated interview invitations, & candidate tracking to improve recruitment efficiency,

CERTIFICATIONS

- **Web Development** (60 days training + 35 days of internship where I built an PG Life website for students to search and book PG accommodations across cities) from Internshala
- **PySpark** from Infosys Springboard
- Project Excellence: Mastering your minor and major Projects with Real-World Case Studies using **Gen AI/Agentic AI/ML** from EXCELR
- **LLM, NLP, AI and ML involving chatbot development**, & **Gradio** based application Workshop- Mevi Technologies
- **TechA Cloud Computing using Microsoft Azure** Certification from Infosys Springboard

LEADRERSHIP EXPERIENCE: Sub-core Member VTU Youth Fest 2025 & Headed the AIML Department's Event Management Club
